

# Creating a Teacher Account

To access BootUp curriculum resources and professional development (PD), you'll first need to create a free educator account. Follow the steps below to get started.

## Create Your Teacher Account

1. Click the **Create Account** button in the upper-right corner of our home page.
2. Enter your First and Last Name, and Email Address.  
*You will receive important information on how to complete creating your account.*
3. Click **Submit Form**.

## Complete Your Registration

1. Check your email for a message with instructions to complete your registration.
2. Confirm that you are 18 years of age or older and click **Submit**.

## Welcome to BootUp PD!

Once your registration is complete, you will receive a *Welcome to BootUp* email with helpful information and a link you may share with your students to create student accounts (grades 3+).

## Student Accounts (Recommended for Grades 3+)

BootUp recommends student accounts for students in 3rd grade and higher. At these grade levels, students are typically more developmentally ready to independently manage usernames, passwords, digital assignments, and online learning tools with teacher guidance and supervision.

Student accounts allow learners to:

- Access BootUp curriculum and resources independently
- Save and continue work over time
- Engage more directly in personalized computer science and AI learning experiences

For younger students in grades K–2, BootUp activities can still be implemented successfully through teacher-led instruction, shared devices, pair programming, or classroom-based participation without requiring individual student accounts.

For assistance with account setup, please contact [info@bootuppd.org](mailto:info@bootuppd.org).
